Professional Summary

Flutter developer with **4 years** of experience creating scalable, high-performance cross-platform mobile applications for **Android** and **iOS**. Proficient in state management (**Provider, BLoC, Cubit**), **MVVM, MVC**, and **clean** architecture, **API** integration, and app deployment to the **Play Store** and **App Store**. Skilled in **Firebase, RESTful APIs**, and CI/CD pipelines. Delivered **e-commerce, logistics, CRM**, and **fintech** solutions with **clean** code, user-centric design, and optimized performance.

Key Expertise

- Solid knowledge of Dart, Flutter, Git, and Agile methodologies.
- Translating UI/UX designs into functional mobile apps using Flutter.
- Collaborating with designers and developers for user-friendly app design.
- Building cross-platform applications and integrating APIs for seamless front-end-back-end communication.
- Using state management techniques (Provider, BLoC) to maintain clean architecture.
- Improving app performance by optimizing code and reducing widget rebuilds (30% performance boost).
- Debugging and testing apps to ensure cross-platform compatibility.
- Interacting with clients to gather requirements and ensure the quality of the final product.
- Managing projects with efficient task prioritization and meeting tight deadlines.
- Updates and enhancements to the app after the deployment based on user feedback.

Technical Skills

Frameworks: Flutter

Languages: Dart

State Management: Provider, BLoC, Cubit

Architecture: MVVM, MVC, and Clean

Database: Firebase and MariaDB

Integrations: REST APIs, Razorpay, Google Maps API

Version Control: Git, GitHub, GitLab

CI/CD: Azure DevOps

Tools: Android Studio, VS Code, Xcode, Postman, Figma

Project Management: Agile, Jira, ClickUp

Experience

Senior Software Engineer	*Chennai, Tamil Nadu*
Dexian India	*Sep 2025 – Present*
Senior Software Engineer	*Trichy, Tamil Nadu*
Zwork Technology	*Dec 2023 – Jul 2025*
Software Engineer	*Trichy, Tamil Nadu*
Adsdunia Private Limited	*Dec 2021 – Nov 2023*
Software Engineer - Trainee	*Trichy, Tamil Nadu*
Adsdunia Private Limited	*Sept 2021 – Nov 2021*

Education

St. Joseph's College (Autonomous), Tamil Nadu, India   *June 2019 – June 2021*
M.Sc. Computer Science

Projects

ABCD Merchant   *Project Lead*

- Took ownership of the project during mid-development phase and stabilized the application for production readiness.
- Identified, fixed, and optimized critical bugs related to UPI transactions and merchant payment flows.
- Continued feature development as per product and UI/UX team requirements, ensuring alignment with business goals.
- Integrated and refined personal and business loan referral features within the merchant application.
- Coordinated with product, backend, and QA teams to resolve issues and successfully publish the app.

ABCD Aditya Birla Capital   *Team Member*

- Joined the project during an ongoing development phase and contributed to stabilizing existing UPI payment features.
- Fixed functional and UI bugs across UPI payments, bill payments, and UPI Lite transactions.
- Improved transaction reliability by handling edge cases, payment failures, and reconciliation issues.
- Continued development based on product team designs and business requirements.
- Enhanced UPI payment modules including QR-based payments, collect requests, and transaction status handling.
- Actively supported testing cycles, production bug fixes, and release deployments.

Zway CRM   *Project Lead*

- Lead management app for businesses running Facebook, Google, and Instagram ads
- Integrated push notifications and direct dialing for lead updates
- **Tech Stack:** Flutter & Dart (Frontend), Laravel API (Backend)
- **Integrations:** Firebase for Notification

Gracias (Multi-Language)   *Solo Developer*

- Online store app for gifts, food, electronics, and clothing
- **Tech Stack:** Flutter & Dart (Frontend), WordPress REST API (Backend)
- **Integrations:** Google Maps

Upgrade Fit   *Project Lead (Team of 2)*

- Gym management app for training session bookings and pricing
- Users can select categories and book slots
- **Tech Stack:** Flutter & Dart (Frontend), Laravel API (Backend)
- **Integrations:** Firebase for Notification

Motoziet   *Solo Developer*

- An all-in-one application designed to meet a wide range of car services.
- Integration with Google Maps to display nearby service shops based on the user's current location.
- **Tech Stack:** Flutter & Dart (Frontend), Laravel API (Backend)
- **Integrations:** Google Maps, Firebase for Notification, Google Gmail sign-in, and Apple sign-in

Tranzo   *Project Lead (Team of 3)*

- Logistics app for sending and receiving packages
- Implemented pincode-based nationwide delivery
- Integrated push notifications and payment options
- **Tech Stack:** Flutter & Dart (Frontend), Laravel API (Backend)

- ○ **Integrations:** Firebase for Notification, Razorpay, Google Maps

Daily Cuts *Solo Developer*

- ○ Online store for groceries, meat, vegetables, and household essentials
- ○ Integrated Google Maps for address management and order delivery
- ○ Implemented multiple payment options (Razorpay, COD)
- ○ Added delivery scheduling for specific dates and times
- ○ **Tech Stack:** Flutter & Dart (Frontend), Laravel API (Backend)
- ○ **Integrations:** Firebase for Notification, Razorpay, Google Maps

Certifications

Google Play Store Listing Certificate
